MOBIL APP DEVELOPMENET LAB

WEEK 1: Install Android Studio and Create Hello World App

Android Studio provides a complete integrated development environment (IDE) including an advanced code editor and a set of app templates. In addition, it contains tools for development, debugging, testing, and performance that make it faster and easier to develop apps. You can test your apps with a large range of preconfigured emulators or on your own mobile device, build production apps, and publish on the Google Play store.

PROCEDURE:

Phase 1: Install Android Studio

Phase 2: Create Hello World App

Step 1: Open Android Studio

Step 2: In the main Welcome to Android Studio window, click New Project

Step 3: choose Empty Activity

Step 4: Enter Project Details

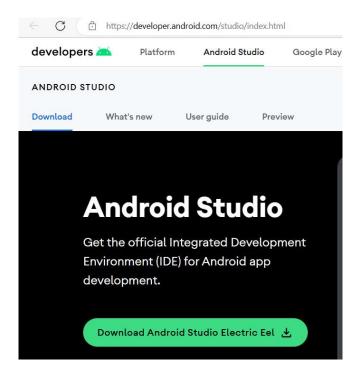

Step 5: Explore Project Details

Step 6: Study Code

Step 7: Use Android Virtual Device (Emulator)

Step 8: Run the App on the Virtual Device

Phase 1: Install Android Studio

Procedure:

Step 1: Download from https://developer.android.com/studio/index.html

Step 2: Run Setup \rightarrow Next... \rightarrow Finish

Step 3: Import Studio Setting Option → Do not Import Settings

Step 4: Install Type Option → Standard

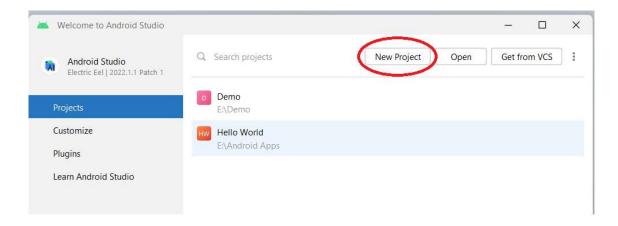

Step 5: Select UI Theme → Done

Phase 2: Create Hello World App

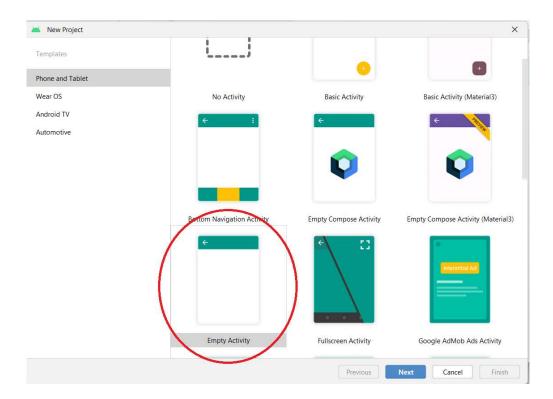

Procedure:

Step 1: Open Android Studio

Step 2: In the main Welcome to Android Studio window, click New Project

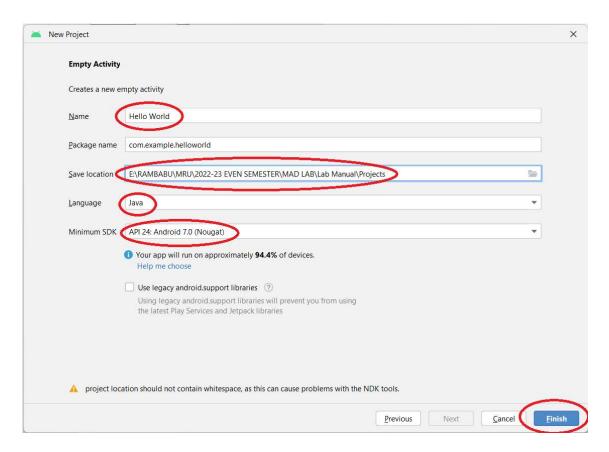

Step 3: choose Empty Activity

Step 4: Enter Project Details

Enter Name → Accept Default Package Name → Choose Save Location → Select Language → Select Minimum SDK → Click Finish Button

Android Studio creates a folder for your projects, and builds the project with Gradle.

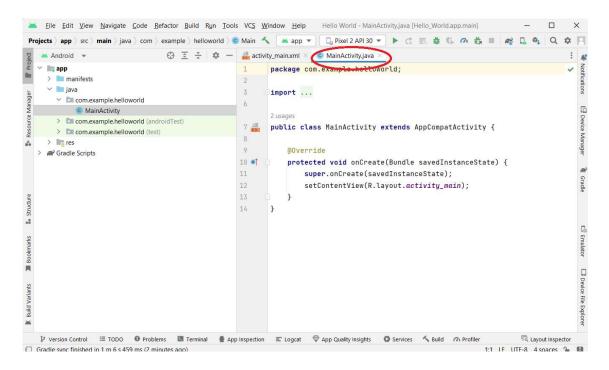

You may also see a "Tip of the day" message with keyboard shortcuts and other useful tips. Click **Close** to close the message.

The Android Studio editor appears. Follow these steps:

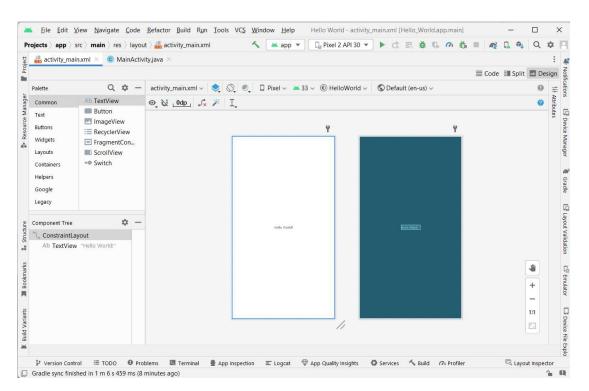

- 1. Click the activity main.xml tab to see the layout editor.
- 2. Click the layout editor **Design** tab, if not already selected, to show a graphical rendition of the layout as shown below.

Step 5: Explore Project

```

AndroidMainfest.xml

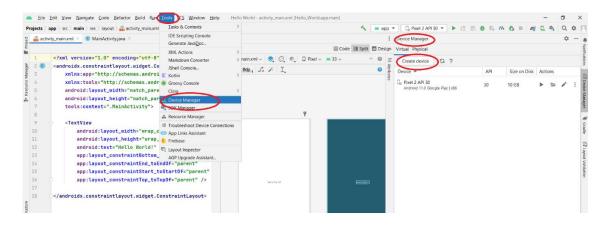

Step 6: Study Code (TextView Component)

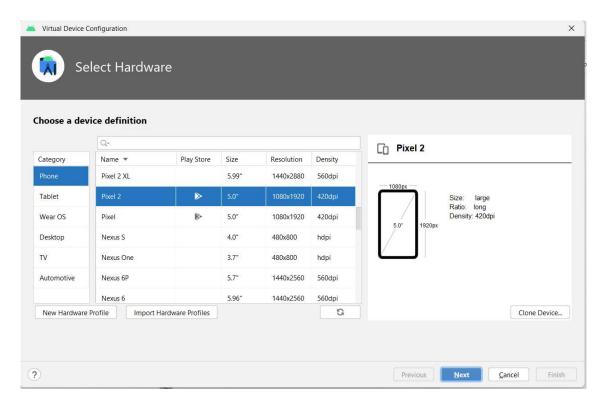

Step 7: Use Android Virtual Device (Emulator)

Create Android Virtual Device (AVD):

Menu → Tools → Device Manger → Create Device

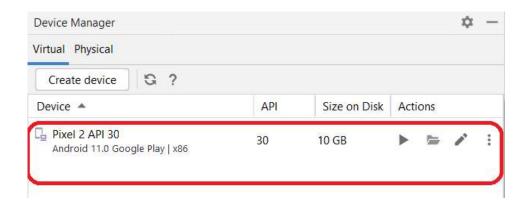

Choose Device Definition → Select Category (Phone) → Select Pixel 2 → Next → Select System Image → Install → Next

Verify Configuration → Finish

Device will be added.

Step 8: Run the App on the Virtual Device
