

BDA MINOR-I QUESTIONS

Unit-I

- 1) What is Big Data? Explain Data Types of Big Data with example?
- 2) What are the characteristics (5V's) of Big Data? Explain.
- 3) Explain Hadoop Architecture with neat sketch
- 4) What is YARN? Explain about the responsibilities of a Resource Manager.
- 5) Explain the advantages and disadvantages of HDFS.
- 6) Explain Big Data Technologies and narrate the evaluation of Big Data.

Unit-II

- 7) What is Map Reduce? Explain key components of Map Reduce?
- 8) Explain NameNode and DataNode in HDFS?
- 9) Explain the end-to-end architecture and workflow of a read operation in HDFS?
- 10) How data or file is written into HDFS with neat diagram?
- 11) What is the key- value pair in MapReduce? Why MapReduce uses the key-value pair to process the data?
- 12)
 - a) What is a Heartbeat in HDFS?
 - b) Why HDFS performs replication, although it results in data redundancy?
