1. Basic Concepts

(a) Leap Year and Ordinary Year

- **Leap Year:** A year is a leap year if:
 - It is **divisible by 4**, and
 - It is **not divisible by 100**, unless it is also **divisible by 400**.
 - Example: 2000 (Leap Year), 1900 (Not a Leap Year), 2024 (Leap Year)
 - A leap year has **366 days** (February has 29 days).
- **Ordinary Year:** A year that is not a leap year.
 - An ordinary year has **365 days**.

-Harish kumar

SHK

Calendar

A non-leap year has exactly 365 days, 5 hours, 48 minutes, and 46 seconds

(b) Odd Days Concept

Odd days refer to the extra days left after dividing the total number of days by 7.

- 1 Ordinary Year = 365 days = 52 weeks + 1 odd day
- 1 Leap Year = 366 days = 52 weeks + 2 odd days
- 100 years = 76 ordinary years + 24 leap years
 - $(76 \times 1 + 24 \times 2) = 76 + 48 = 124$ odd days
 - $124 \div 7 = 17$ weeks + 5 odd days
 - So, 100 years have 5 odd days.
