Model 2

Basic Formulas:

1. Union of Two Sets

$$n(A \cup B) = n(A) + n(B) - n(A \cap B)$$

2. Union of Three Sets

$$n(A \cup B \cup C) = n(A) + n(B) + n(C) - n(A \cap B) - n(B \cap C) - n(A \cap C) + n(A \cap B \cap C)$$

3. Intersection of Two Sets

$$n(A \cap B) = n(A) + n(B) - n(A \cup B)$$

4. Intersection of Three Sets

$$n(A \cap B \cap C) = n(A) + n(B) + n(C) - n(A \cup B) - n(B \cup C) - n(A \cup C) + n(A \cup B \cup C)$$

Model 2

In a school, 50 students like Cricket (**C**) and 40 students like Football (**F**). If 20 students like both Cricket and Football, find how many students like at least one of the two sports.

In a college, **80 students** study **Mathematics (M)**, **60 students** study **Science (S)**, and **30 students** study both subjects. Find:

1. The number of students studying at least one subject.
2. The number of students studying only Mathematics.
3. The number of students studying only Science.
