

MALLA REDDY UNIVERSITY

DEEP LEARNING

MINOR-1 Important questions

- 1) Explain Bayesian Statistics with reference to Bayes Theorem.
- 2) Explain the steps involved in build an ML Algorithm.
- 3) Explain the key differences between Machine Learning and Deep Learning with examples.
- 4) Difference between Overfitting, Underfitting and Capacity in detail.
- 5) What is TensorFlow? What are the Components of TensorFlow?
- 6) How to perform Linear Regression in TensorFlow, and Provide a step-by-step guide for the process?
- 7) Explain Perceptron with Activation Functions: ReLU
- 8) What is a Perceptron & explain its components with a diagram?
- 9) What is an Artificial neural network (ANN)? Describe its basic structure and components.
- 10) Explain Perceptron Learning Rule, How does it work?
- 11) Explain about Cross Validation in ANN
- 12) Write about Feature Selections in ANN.
