

Branch: Computer Science & Engineering
Sub: Adaptive Computer Technologies

Year / Sem: I/II
Sub code: MR22-1ES0103

QUESTION BANK

UNIT-I	1. Explain the characteristics of computer networks and list the advantages of computer networks?
	2. Explain different types of networks? Give brief description of each network.
	3. What are the five network performance metrics? Briefly explain
	4 a) Describe wireless transmission with neat sketch? 4 b) Explain wired transmission media in detail?
	5) What is 5G technology and its applications? Explain it briefly
	6) Write short notes on a) HUB b) Repeater c) Switch d) Bridge e) Router f) Gateway g) Network Interface card h) RJ45
	7) Discuss various types of networks topologies in computer networks?
UNIT-II	1. What is an IP address? Explain different types of IP address.
	2. What is the use of DNS? Explain how it works
	3. Write short notes on a. Email b. FTP c. Internet

	d. Penetration Testing
	4 a) What are the important features of WWW and Explain 4 b) What are the 5 components of encryption and What is decryption? What is its need?
	5. Discuss about the following a. Virus b. Malware c. Trojan Horse d. Worm
	6. Explain briefly about a. Spyware b. Rootkit c. Phishing d. DDos
	7. What is a Firewall? Discuss the advantages of firewall.
UNIT-III	1 a) What is distributed computing? Explain it briefly. 1 b) Comparison between grid and cloud computing 2 a) Explain utility computing with an example 2 b) Explain briefly about characteristics of Cloud computing
